SECTION TWO: CAPSULE RATING OF OBSERVED LESSON

In this final rating of the lesson, consider all available information about the lesson, its context and purpose, and your own judgment of the relative importance of the ratings you have made. Select the capsule description that best characterizes the lesson you observed. Keep in mind that this rating is not intended to be an average of all the previous ratings, but should encapsulate your overall assessment of the quality and likely impact of the lesson you just observed. Please provide a brief rationale for your final capsule description of the lesson in the space provided.

Unacceptable

Instruction is highly unlikely to enhance students' understanding of the discipline or to develop their capacity to successfully "do" the discipline. For example, instruction may be pedantic or uninspiring; students may be passive recipients of information from the teacher candidate or textbook; or material may be presented in a way that is inaccessible to many of the students. Alternatively, students may be involved in hands-on activities or other individual or group work, but it may appear to be activity for activity's sake, without a clear sense of purpose and/or a clear link to conceptual development.

Immediate intervention involving the college supervisor, cooperating teacher, and candidate is needed.

Approaching

Instruction contains some elements of effective practice, but there are problems in the design, implementation, content, and/or appropriateness for many students in the class. For example, the content may lack importance and/or appropriateness; instruction may not successfully address the difficulties that many students are experiencing, etc. Overall, the lesson is very limited in its likelihood to enhance students' understanding of the discipline or to develop their capacity to successfully "do" the discipline.

If this is other than a first observation, student performance at this level may indicate that intervention is needed.

Acceptable

Instruction is well-designed, purposeful and characterized by most elements of effective practice. Students are usually engaged in meaningful work, but there are some weaknesses in the design, implementation, or content of instruction. For example, instruction addresses the needs of most students, but the classroom climate may limit the effectiveness of an otherwise well-designed lesson. Overall, the lesson is likely to enhance students' understanding of the discipline and develop their capacity to successfully "do" the discipline.

Target

Instruction is purposeful and engaging. Students actively participate in meaningful work (e.g., investigations, student presentations, collaborative activities, physical demonstrations, reading) throughout the lesson. The lesson is well-designed and implemented. The teacher candidate is responsive to students' diverse needs and interests. Instruction enhances students' understanding of the discipline and develops their capacity to successfully "do" the discipline.
