II. ALGEBRA	5	8	4 - 7
III. GEOMETRY AND MEASUREMENT	7	9	5 - 8
IV. DATA ANALYSIS AND PROBABILITY	8	10	6 - 9

Category-level information indicates the number of test questions answered correctly for relatively small subsets of test questions. Because they are based on small subsets of questions, category scores are less reliable than the official scaled scores, which are based on the full set of questions. Furthermore, the questions in a category may vary in difficulty from one test form to another. Therefore, the category scores of individuals who have taken different forms of the test are not necessarily comparable. For these reasons, category scores should not be considered a precise reflection of a candidate's level of knowledge in that category and CTS as a composite. This category information may be used to inform any additional selecting candidates without causing any distortion of test taker level of precision.

The range of scores earned by the middle 50% of a group of examinees who took this form of test at the most recent general certification or other comparable time period (N/C means the data was not computed because fewer than 30 examinees took this form of the test) is displayed. If there are more than 8 examinees in the category or, for a composite, more than 8 items to be awarded by the form, N/A indicates that this test section is not taken and, therefore, the information is not applicable.
